

HIGH-SPEED INTERNET COMMITTEE REPORT
2021 CCS HOA ANNUAL MEMBERS MEETING

This committee been tasked to look into high-speed internet opportunities/options to be provided to all members of the HOA. It's important to know and understand what this means and how the state of Colorado looks at it.

According to the state of Colorado "high speed" internet is 25 megabytes per second (Mbps) download and 3 Mbps upload. Currently, CenturyLink provides this capability to our area so we are not on the critical path for local/state funding to increase or provide additional sources.

There are 5 internet providers in the local area. They are Stratus, Force Broadband, XFINITY, Kellin and Spectrum.

An e-mail was pushed out in September to the HOA asking for member input into interest in pursuing more opportunities. I have been getting input sporadically throughout the weeks to include last week.

MICHAEL E. MAULE
Committee Chair
